- AP Statistics: Chapters 1.1 – 6.3
- Probability and Statistics: Chapters 1.1 – 5.5 (AP section 2.0)

Exam Format:

Both exams will consist of 30 Multiple Choice and 3 Free Response questions.

- Each Multiple Choice question will be worth 2 points for a total of 60 points.
 - Bubble Scantron sheets will be used.
- Each Free Response Question will be worth 10-15 points for a total of 40 points.
 - The free response questions will be made up of multiple parts (for example a, b, c, ...)
- This exam grade will count 20% toward your semester average.
- You can make a single, one-sided sheet of notes to be used on the exam.
- You will receive a formula sheet along with the exam of any formulas that may be necessary.

How to Prepare:

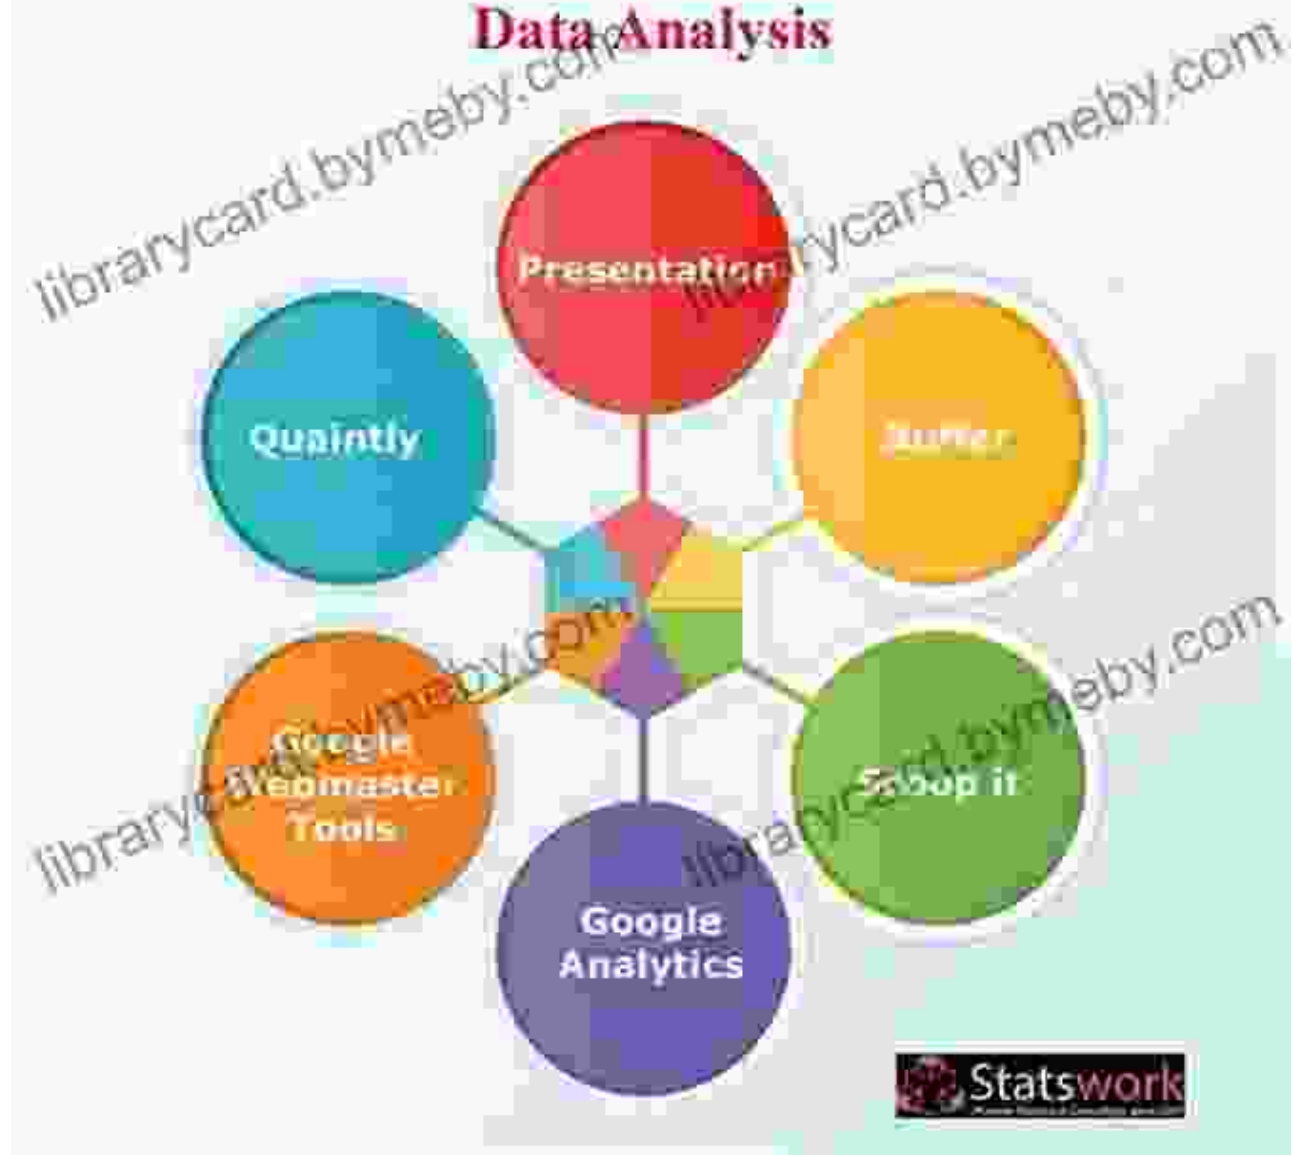

Any previous AP problem, HW problem, test or quiz problem, textbook example, or classroom example, or key definition or concept is fair game for the exam.

- Use your previous tests and quizzes to find example problems.
- Do some select Practice Problems and exercises from each chapter.
 - Do the problems that match up with the concepts outlined below.
 - There are review problems at the end of each chapter.
- Make sure you have read each section that will be covered. Hopefully you have already read or at least skimmed them, and you can briefly go over the highlighted terms and examples in each.
- Review the example problems from each section, paying attention to the format in which they show their work.
- AP Students:
 - Review the AP Multiple Choice practice sets that we have done.
 - Look at any other AP Multiple Choice set in the textbook that we have not done (at the end of each chapter).
 - Review the AP Free Response questions we have done. Pay attention to the format and details in which we have repeatedly stated you need to include on these problems.
